

## March 21, 2018 \* 6:00 to 7:15 PM

Please join us for our first Family Code Night! A code is what computer programmers use to tell a computer what to do. Computer programming is currently, and is expected to continue to be, a skill that is in high demand. This event will help families learn more about what coding is (or give an opportunity for additional fun for families who have coding experience)!

Our Family Code Night will be a FREE evening event at New Market. There is no coding experience necessary! Participants will learn how to code using fun puzzles from code.org.

Please do not let the fear of the unknown stop your family from participating as we will all be learning together. Also, there are no Mistakes in coding! If your code doesn't work, no problem...you would just move to the next step called "debugging".

Already know how to code? There will still be fun coding opportunities to do with your child. Also, we could use volunteers! If you can volunteer for that evening, please contact [chris.larson@southmont.k12.in.us](mailto:chris.larson@southmont.k12.in.us).

This is open to all NMES families (Kindergarten through 6<sup>th</sup> grade). Other siblings may also attend with the family.

---

### Family Code Night, March 21, 6:00 to 7:15 PM – Registration Form

*Please return this form to school by March 2, 2018*

How many family members will be attending in all (including children)? \_\_\_\_\_

Oldest NMES child that will be participating: \_\_\_\_\_ Teacher: \_\_\_\_\_

Names and grades of any additional New Market students: \_\_\_\_\_

\_\_\_\_\_

Names of adult(s) attending:

\_\_\_\_\_

We will use student Chromebooks or iPads.

Volunteers – We can use volunteers! No coding experience necessary! \_\_\_\_\_
